

Fee-for-Service (FFS) HIPAA Electronic Data Interchange (EDI)

What is EDI?

EDI allows FFS 2 Providers (Organization, Groups, and Individuals) to transmit HIPAA ASC X12N electronic transactions, invoices, and remittance information between businesses. The concept involves defining a standard format for the transmission of data between two businesses, which allows the whole transaction process to be automated. EDI refers to the capability of the IS to receive data submitted by users utilizing secure file transfer (SFT) via the Internet. For more information, please contact the HIPAA EDI Testing and Certification Unit at 213-351-2829.
