Some Providers are Still on MHMIS

Attention: All Providers

STOP – Impact on You

There are still some DMH contractors and directly operated providers who are using the MHMIS system to enter information. This can cause confusion because client and episode data might not be visible in the IS.

CAUTION – What You Need to Know

For a variety of reasons, a few providers in the LA County Mental Health network are still using the MHMIS system. These providers include Pacific Clinics, Public Guardian, Jail Mental Health, and three County inpatient hospitals: LAC-USC Medical Center, MLK/King Drew Medical Center and Olive View Medical Center.

Client data is synchronized between the two systems once a week. However, episodes and services in MHMIS will not be visible in the IS. Field updates in MHMIS such as SFPR are not available in the IS until the weekly update. Episodes created in MHMIS that have been discharged are also unknown to IS users.

GO – What You Need to Do

Users who suspect they are having a problem because of this issue should contact the Help Desk for assistance.
